2015's BEST DOCTORS

Rating the thousands of doctors located in the Bay Area is no easy task. For their "Top Doctors of 2015" list, San Francisco Magazine turned to Castle Connolly Medical Ltd., a company dedicated to guiding patients towards the finest physicians and hospitals in the country. Castle Connolly asked Bay Area physicians to nominate their peers in 8 counties, and after sifting through nearly 3,000 perspective docs, it was up to the company to use their expertise to narrow down the list. Their research included asking hospital executives and societies for their recommendations, examining each applicants education, board certifications, hospital affiliations, amongst many more strict metrics, and, finally, how many of their peers nominated each of them for this distinction. At the end of this extensive process San Francisco Magazine had their list.
